

Directions for use

FIXING SPRAY

Fixing Spray

Grimas Fixing Spray forms a thin, invisible layer over the skin that protects the make-up from smudging, water and perspiration. It ensures that facepaint, bodypaint and other water-based products stay firmly in place all day.

- Makes make-up smudge-proof
- Protects make-up from water and perspiration
- Ensures smooth and even results
- Microplastic-free

Grimas Fixing Spray is fully compliant with the European legislation regarding the restriction of the use of microplastics in products (EU regulation 2023/2055).

Fixing Spray can also be used as a mixing agent.

One bottle of Fixing Spray contains approximately 200 dosages/sprays. If we assume an average of 4 sprays per face, this means that the contents of one bottle is sufficient for 50 perfectly fixed faces.

Procedure

From a distance of about 30 centimetres, spray the fixing spray in a thin, even layer over the make-up on the skin. Tijdens het opbrengen van de Fixing Spray de ogen gesloten houden. Then let the spray dry completely before touching anything (such as clothes).

Removal

Remove Fixing Spray with Multi Remover Pure or lukewarm water and soap (or shampoo). Massage it in briefly and rinse off with lukewarm water. Do not use ready-to-use cleansing cloths.

Safety information

FIXING SPRAY

Fixing Spray

30 ml

Packaging:	Colour: Black Content: 30 ml
Appearance:	Clear liquid.
Ingredients:	See label and composition.
